

Cloud Connect

Unlock the cloud's full potential

Moving to the cloud is not enough when embarking on your digitization journey. You need a fast and secure connection between your premises and your cloud provider's data center. Meet Cloud Connect.

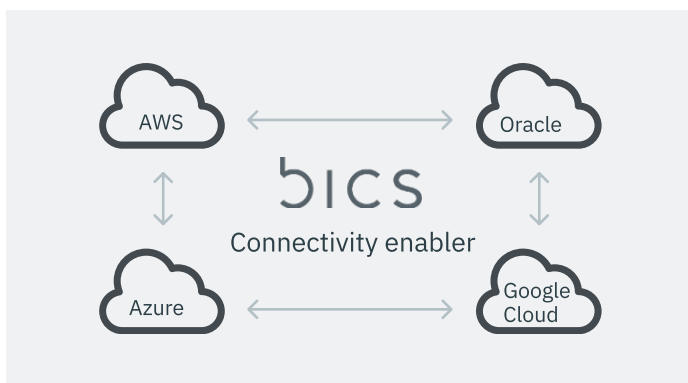

Obstacle-free connection to the cloud

Enterprise data center(s)
physical resources

Local connectivity
provider

Connect to any platform

Google Cloud

Besides global hyperscalers, Cloud Connect guarantees connection to most European providers.

Our dedicated multi-cloud connectivity

- Solution access to a range of **major cloud service providers**
- More than **140+ Points of Presence (PoP)** worldwide
- Enables **private connectivity** between your premises and your provider's data center
- Runs on a **wholly owned and operated network** bypassing the public Internet
- No need for multiple negotiations, handle international connectivity with just **one partner**

Create new connections to the cloud quickly and easily

Log in to the MyBICS portal.

Access your Cloud Connect interface with just a few clicks.

Create direct, secure, ultra-high-performance connections.

Confirm the settings of the new connection via email.

Wait a few minutes for us to provision and implement your new connection.

All done!

Your connection is now live and available in the list of connections.

White label and APIs for the best experience

Do your clients wish to access the platform? You can easily make it feel like their own with white labeling. With APIs, integrate Cloud Connect to your company infrastructure and immediately provision orders.

Cloud Communications done right

- Simplified connectivity
- Secure and reliable connections globally
- Multi-hyperscaler support
- Easy control
- No coding
- 24/7 customer support
