

Solutions for MVNO development

Pull ahead with a cutting-edge IoT offering

Smart tech companies constantly seek reliable MVNOs that support the latest IoT technologies. Become one with our turnkey reseller solution. As an MVNE, we enable any MVNO to start selling global IoT connectivity quickly.

Excellent global connectivity

The software embedded in the SIM applets enables your customers' devices to connect immediately anywhere.

The solution is backboned by our wholly-owned global network, regional infrastructure, and pre-negotiated commercial relationships with 700+ operators, nearly all carriers, worldwide.

No. 1 roaming provider in the world

Carrying **50%** of the world's roaming traffic

Available worldwide (**2G to 5G/ NB-IoT/LTE-M**)

Enabling mobility of **150+** million devices

Always adding value

With us, your offer grows by more than global IoT connectivity. Resell our additional solutions:

SIM

Futureproof connectivity without physical SIMs

Connectivity Twin

Real-time IoT monitoring and downtime prediction

Cloud Connect

Safe connectivity between company premises and cloud data centers

Private IPX

Secure data exchange between private networks

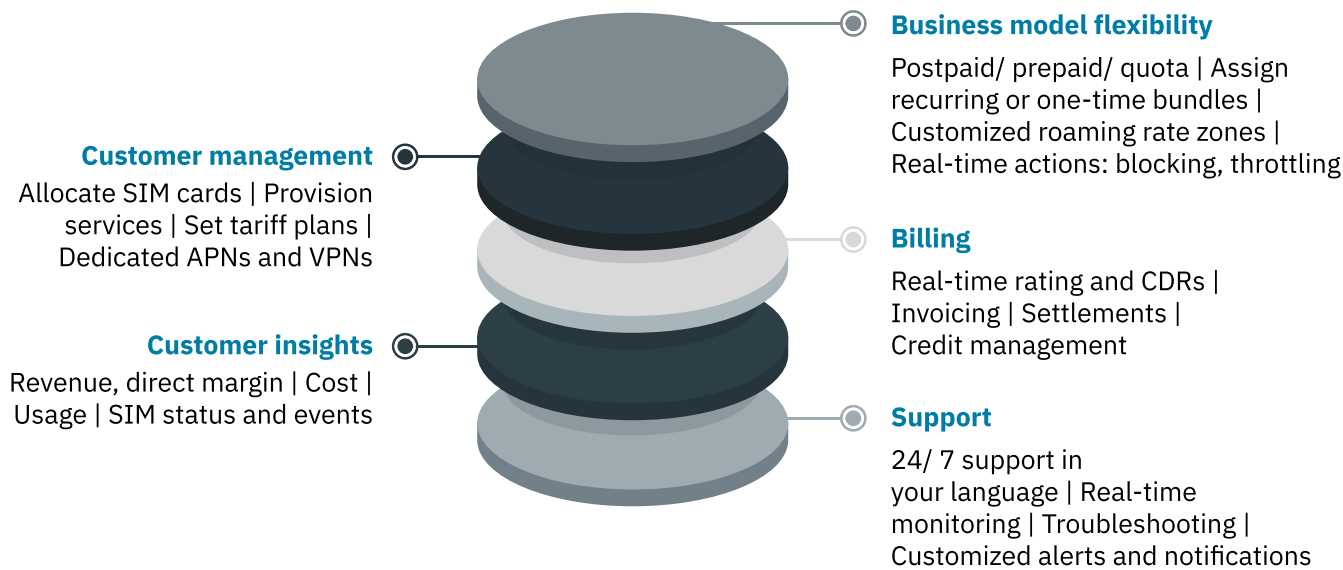

SMART Data Analytics

Automatic issue detection, overview of traffic flows and performance

Get new IoT customers across industries

Industrial manufacturing | Wearables | Automotive | Healthcare | Smart home | Retail | Agriculture | Startups

Fully rebrandable with multiple layers to handle your customers

Benefits of reselling IoT solutions

- Gain a competitive advantage
- Save time and costs
- One implementation partner
- Extensive experience and expertise
- Direct selling across a broad range of verticals
- Pay as you grow model
